Kelvin Kwabena Apau

Data Science and Analytics student

Data Science and Analytics student at GCTU, moving into my third year. I analyse real data, including Ghana Statistical Service figures, and build working software in teams. I am looking for a data or AI internship.

Education

BSc Data Science and Analytics

Ghana Communication Technology University (GCTU)

2025 to present

General Science, WASSCE 2024

Aggrey Memorial A.M.E. Zion Senior High School

2022 to 2024

Projects

Ghana CPI and Inflation Analysis

Personal project

- Worked from original data taken directly from the Ghana Statistical Service StatsBank, not a ready made dataset.
- Found that year on year inflation peaked at 54.17% in December 2022 and averaged 40.28% in 2023.
- Showed that housing and utilities, and transport, had the highest inflation.

Tools: Python, pandas, NumPy, Matplotlib

Hostel Management System (AWS)

Cloud Computing course, team of five

- Built a working hostel app where students book rooms and file complaints, and a separate admin page manages everything.
- I built the AWS side of the project: EC2, S3, CloudWatch and related services.

Tools: AWS (EC2, S3, CloudWatch)

SentinelINIDS: Network Intrusion Detection and Attack Simulation Lab

In progress

- Team Leader of a four week, five person build. I handle the machine learning.
- The detector trains on public intrusion datasets and is tested on traffic captured in an isolated lab.

Tools: Python, machine learning

Other analyses

Personal projects

- **Global banknotes:** 241 historical figures across 38 countries. 78.01% were men, and writers outnumber politicians.
- **NYC Airbnb:** prices barely changed across room types and boroughs, and had almost no link to review count.

Tools: Python, pandas, Seaborn, Matplotlib, Jupyter Notebook

Web Development Projects

Personal projects

- **Portfolio website:** built and deployed my personal site at kelvinapau.vercel.app.
- **Sandy's Birthday Wish:** a small birthday greeting website, live online at sandy-birthday.vercel.app.

Tools: HTML, CSS, JavaScript, Vercel

Experience

Lead Programmer, Aggrey Robotics Team

2022 to 2024

- Built DIPCA, an IoT automatic irrigation system, and OPTIMO, a system that monitors vital signs for healthcare delivery.

Digital Fundraising, M & F Giving Circle

2025 to present

- Designed and ran online campaigns that raise money for the education of underprivileged children.

Skills

Languages Python, JavaScript, C++, HTML and CSS

Data pandas, NumPy, Matplotlib, Seaborn

Tools Jupyter Notebook, Git and GitHub, AWS

Spoken English, French, Twi

Awards and certificates

- Associate Data Scientist in Python, DataCamp (in progress)
- Best Student in Core Mathematics, 2023
- Best Student in Elective ICT, 2022
- FreeCodeCamp Responsive Web Design, 2026
- Robotics Team Certificate of Completion, 2024
